To whom it may concern,

I am 28 years old. My wife is 20. I believe to base rates on valuation of property is very unfair.

We moved to this house for the extra bedroom when we had our 4th child. Now all are married and left home.

We each have a state pension plus money we saved for retirement.

I feel the number of encores going into a house should be taken into consideration.

surely people in our
situation are really
subsidizing others rates.
unconsciously
